

tanhiowyatt

Security Engineer

About

Focused on application security, infrastructure penetration testing, DevSecOps integrations, and active defense architecture. Dedicated to building resilient systems.

Work Experience

2026 - Present

Intern DevSecOps Engineer

OBI Russia

Engineered a secure-by-default ecosystem by building threat-modeling templates, enforcing IaC guardrails, and integrating SAST/DAST policy gates across CI/CD. Further enhanced active defense capabilities by implementing the cyanide-framework honeypot, ensuring robust threat detection and risk reduction while maintaining rapid release cycles.

2025 - 2026

IT Helpdesk Specialist L2

OBI Russia

Managed complex technical escalations and performed root-cause analysis for system and network issues. Automated routine administrative workflows and deployed advanced endpoint hardening baselines, improving overall workstation security posture.

2023 - 2025

IT Helpdesk Specialist L1

OBI Russia

Provided front-line technical support and incident triage for corporate users. Managed access provisioning, assisted with MFA rollouts, and created internal runbooks that significantly reduced average ticket resolution times.

Projects

Active	cyanide-framework ↗ Active defense honeypot framework designed for early threat detection, risk reduction, and security posture monitoring.
Active	lentaflow ↗ Open-source application flow visualization and management solution.

Education

2026 - 2028	HSE - Higher School of Economics Moscow, Russia Master's Degree in Information Security
2023 - 2024	RTU MIREA - Russian Technology University MIREA Moscow, Russia Professional Development in DevOps
2022 - 2026	RTU MIREA - Russian Technology University MIREA Moscow, Russia Bachelor's Degree in Information Security
